Solar by Weller Launches New Website to Promote Green Energy Services

Boyertown, PA – (27-Mar-10) **Solar by Weller**, a division of **Scott A. Weller Carpentry and Cabinets** of Barto, recently launched a new website (www.solarbyweller.com) through [Philadelphia area website design and development company](#), **Media Fusion Technologies, Inc.** (MFT) to promote its green energy services throughout the region.

Specializing in [Photovoltaic \(solar electricity\) and solar thermal technologies](#), Solar by Weller focuses on using 21st century technologies to harness the power of the sun more efficiently than ever before. [Photovoltaic panels](#) mounted on the rooftops or ground-mount racks of homes and businesses generate electricity directly into a structure's electrical panel. Specially designed [solar thermal panels](#) heat up to 90% of a household or business's water each year.

"We are excited to get our new website launched early in 2010," said Scott Weller. "With today's available state rebates and federal tax incentives, customer's final investment on a new Solar by Weller solar system is reduced by approximately 50%.

"We provide a complete package from design and installation, to service and assistance with rebates and incentives. We start with a free site evaluation to determine if solar is right for each home or business. Then we recommend the right type of system to best meet individual property needs. All of this and much more is clearly outlined on our new website which allows customers to comfortably do all of their research before calling."

The website was designed and programmed by MFT in the Microsoft .NET framework using Microsoft SQL Server as the database platform. Together with other technologies, these establish a stable, dynamic, comprehensive and extensible website environment which allows the customer to control site content live time via web browser using MFT's proprietary Content Management System.

The site includes comprehensive information on the products and systems available from Solar by Weller, their features and benefits as well as a photo gallery of recent completed projects, a solar calculator explaining potential energy cost savings and more.

Solar by Weller is part of the largest and fastest growing solar dealer network in the United States and Bermuda enabling them to have purchasing power resulting in their ability to pass on lower costs to the consumer for the high-quality products they install. Solar by Weller is a certified dealer for SolarEnergy.com and multiple solar manufacturers, and is a licensed and approved PA Sunshine Rebate and Keystone HELP contractor.

For more information on Solar by Weller, visit www.solarbyweller.com or call 610.845.6066.
